New devices

Looks like there are no devices available to register on the network. If your device is on and connected to the internet, try registering it using instructions in its instruction manual.

Classic printers

You can add classic printers connected to your computer to Google Cloud Print.

Add printers

My devices

Save to Google Drive

Save your document as a PDF in Google Drive

Manage

Check the box for the printers you want to set as a Classic Printer (Any printer installed locally on the PC you are on) and click **Add printer(s)**

Google Cloud Print beta

Printers to register

Google Cloud Print has detected the following printers connected to your computer. Click below to add the selected printers to Google Cloud Print for account [redacted]@gmail.com.

This step is not required to print to Google Cloud Print. Clicking "Add printer(s)" will just add your local printers to your account. [Cloud Ready Printers](#) can connect directly without this step.

- Foxit Reader PDF Printer
- FX ApeosPort-V C3373 PCL 6
- Nitro PDF Creator (Reader 3)
- WC7855 PS**
- wc7970 PS
- WC7970-LAB PS
- WebEx Document Loader
- Automatically register new printers I connect

Add printer(s)

Installation complete.

Google Cloud Print beta

Thanks, you're ready to go!

Your printers are now registered with Google Cloud Print. [Manage your printers](#)

Tip: You only need to add your printers to Google Cloud Print through one computer. Registering on more than one might cause you to see duplicate printers. [Share](#) your printers to use them with other accounts.

Now to share the printer to others. You can select **Manage your printers** on the previous page, or go to **Chrome://devices** or go to **Menu > Settings > Show Advanced Settings > Google Cloud Print > Manage > Manage**

Then Choose **Manage** for the printer you want to share

▶ Advanced Details

Add a Cloud-Ready Printer

Add a Classic Printer

Then just enter the email address of the Chrome user you want to share the printer with

wc7970 PS sharing settings

Who has access:

	Private	Change...
	Joe Arseneau (jarseneau@gmail.com)	Owner

Invite people:

[Can print](#)

[Share](#) [Close](#)

That user will get an email to accept the printer, as soon as it is accepted they will have access.

From Chrome they just select **Menu > Print** and the printer will be listed among their printers at the bottom.

The printer will be very limited on selections, but will hold all the settings in Printing Preferences, So XSA will work as long as it is hard coded and not set to prompt. If it is set to prompt, it will actually prompt at the PC where the local driver is installed
