### III. Additional Details

A warning message may appear when installing the software; pkg can't be opened because Apple cannot check it for malicious software". If user experiences this warning, please choose one of the 2 workarounds to mitigate the error;

1. Open System Preferences App > Security & Privacy tab and click "Open Anyway"
2. The user needs to right click on the package(.pkg) and click on Open.

After performing one of the workarounds run the install again, select open when the warning message appears. The warning will not be shown again for future installation of the same package.
