

Must be on Android 4.4 or later, NFC capable phone, NFC enabled on phone , Must have phone and printer on same LAN

Must have Xerox Print Service plugin installed

<https://play.google.com/store/apps/details?id=com.xerox.printservice&hl=en>

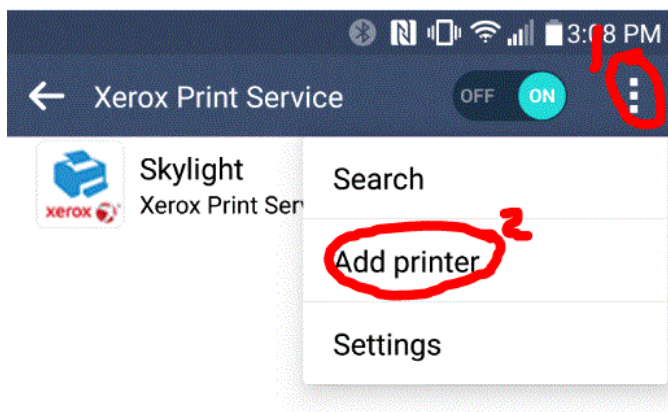

Now, to run the plugin once installed varies greatly per manufacturer and through the current Skin you are using on it.

So for an LG phone, it would likely be found ala **Settings > Share & Connect > Printing**

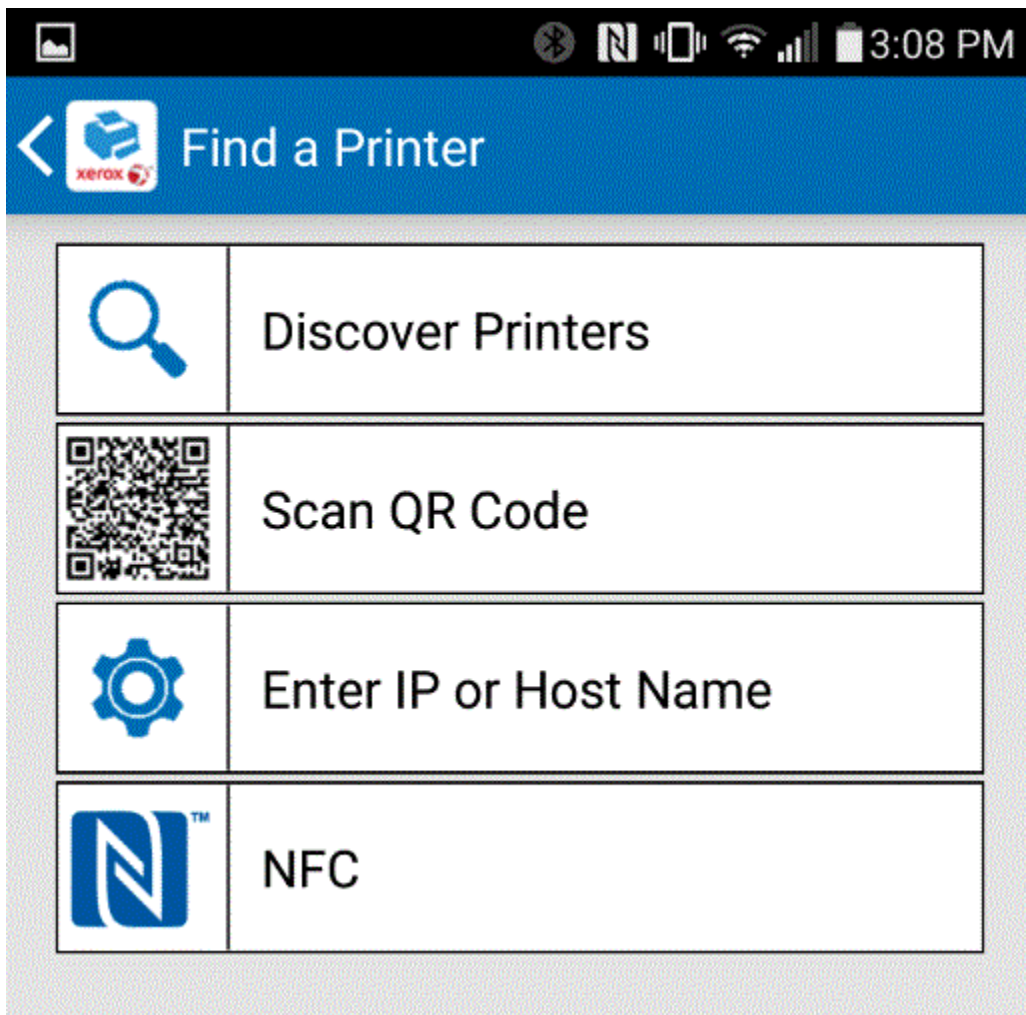

Pixel/Nexus phones would be **Settings > Printing**

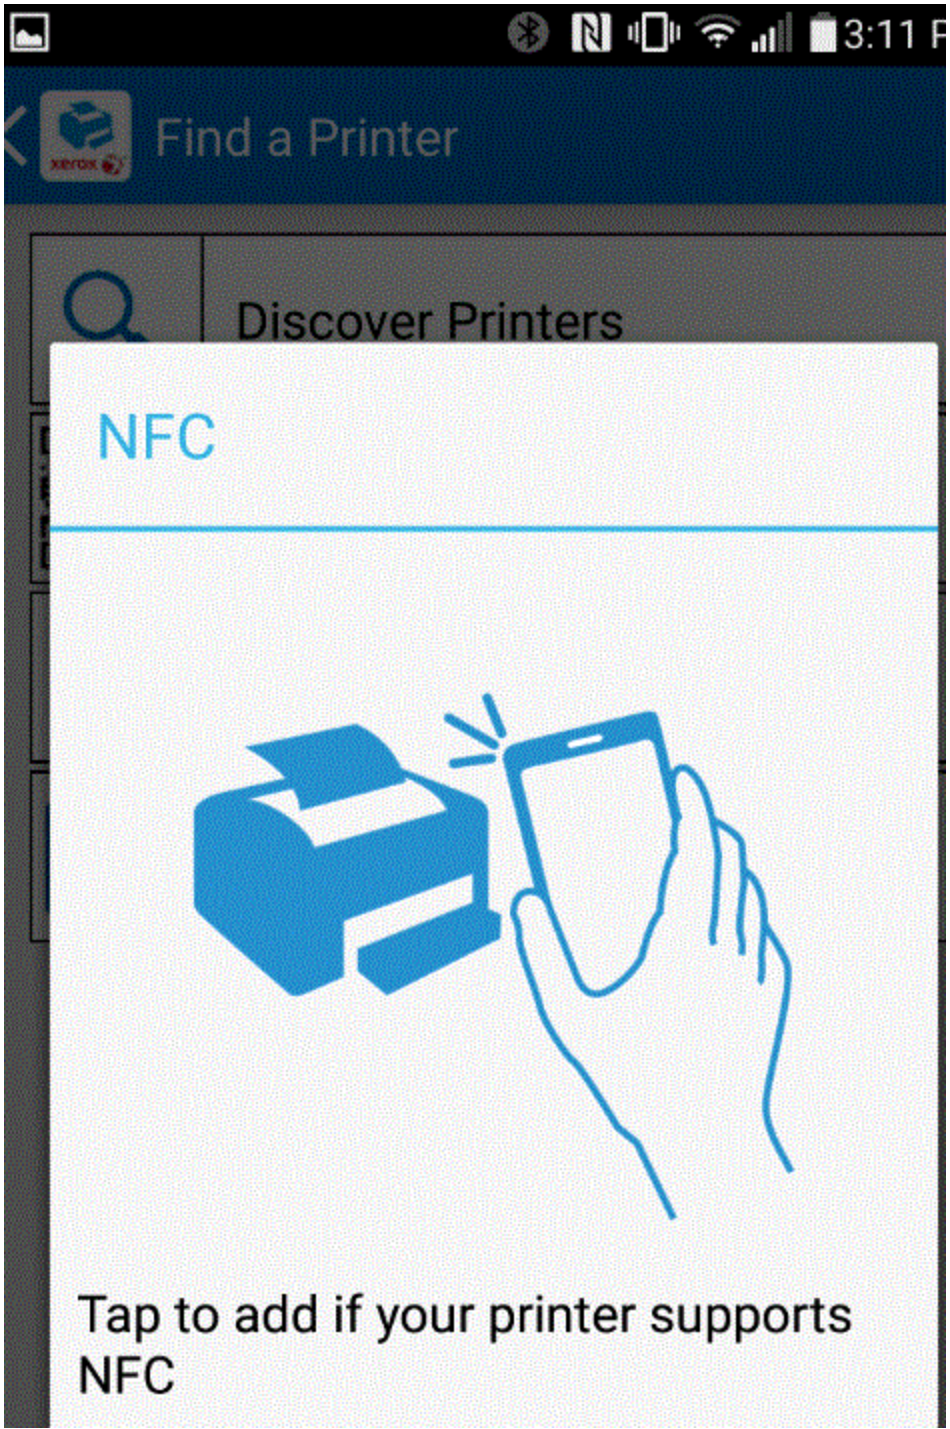

Samsung is **Settings > More Networks > Printing**

At which point you should be able to have a menu (3 dots) on screen upper right, or on Samsung pre S8 model, the physical **Menu** button, Select it **(1)** and choose **Add printer (2)**

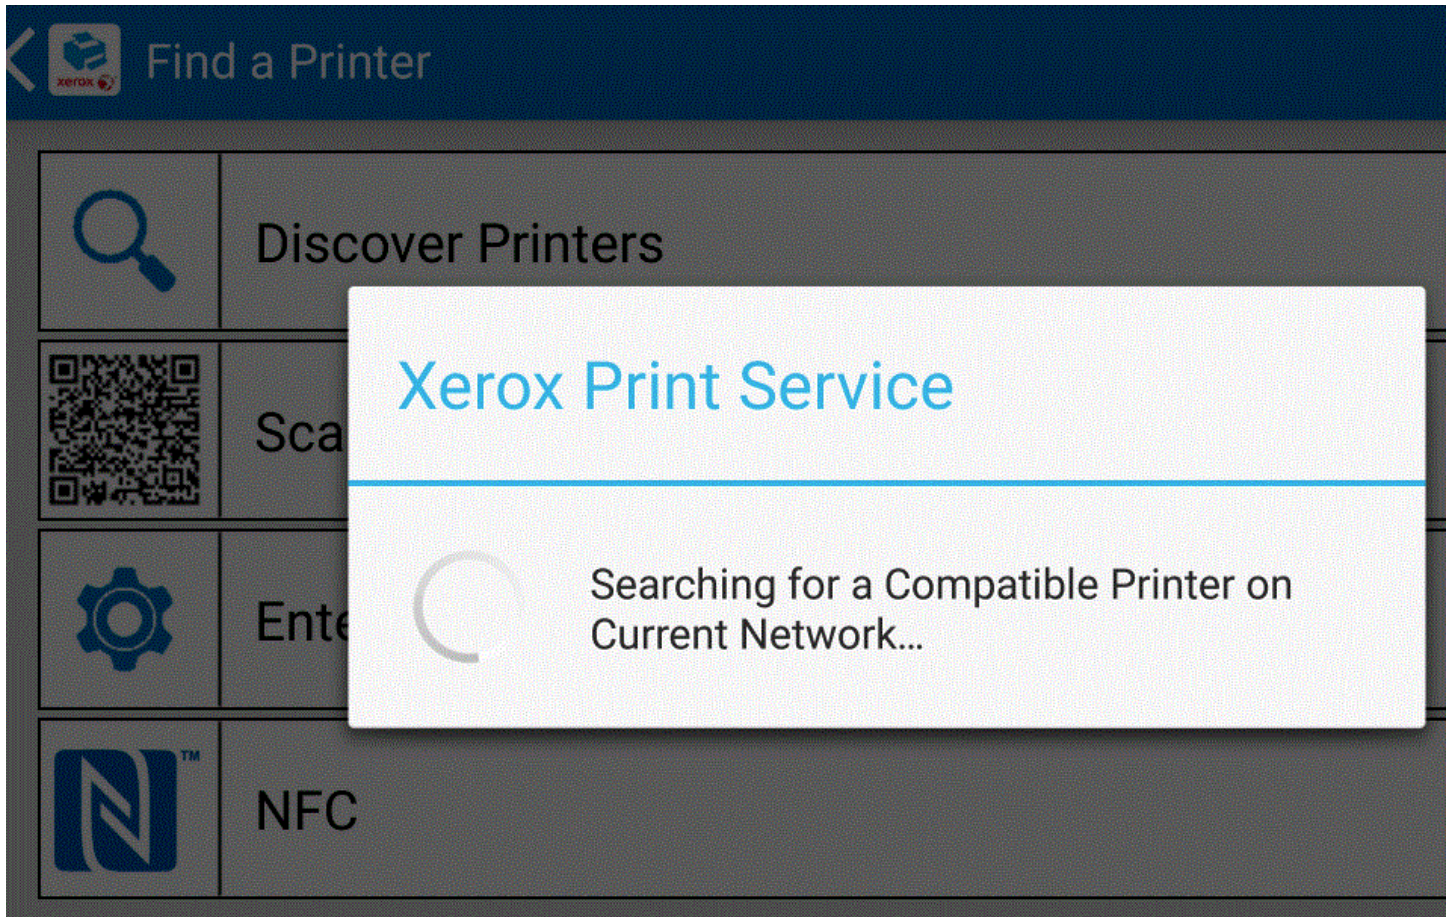

Then you can select NFC, or just tap the phone to the printer NFC tag

You will get a popup saying this

And then it should appear as a printer
